I have pleasure to inform you that on the commemoration of the centenary of the famous mount Krakatau eruption, the Indonesian Institute of Sciences (Lembaga Ilmu Pengetahuan Indonesia - LIPI), will launch a series of scientific activities in the form of expeditions, research and a symposium concerning Mount Krakatau.

The expedition and research activities will be conducted between August 1981 and August 1983. As a climax in the agenda of the commemoration, a symposium discussing the results of the two years expedition and research activities on Mount Krakatau and its surroundings will be conducted. This symposium will be scheduled around 27th of August 1983.

In the scientific activities and the symposium, vulcanology and geology, marine and terrestrial biology, oceanography and other social aspects related to mount Krakatau eruption, have been chosen as fields of studies.

I should therefore, appreciate very much if you could forward this announcement to the institutions and scientists in your country interested in participating in the events. The participants are expected to submit their programmes and find out their financial supports to cover all of their expenses.

Looking forward to hearing from you at your earliest convenience.

With best regards,

sincerely,

Didin S. Sastrapradja
Deputy Chairman for
Natural Sciences

TRIPS: 2nd Divisional trip, this time to Martinique and St. Vincent
is on.

The Galapagos have been and are currently being visited by
many. Ray Goldie or Maurice Lambert may be able to help you. Also,
there is a year-end extravaganza with McBirney to those islands.

Mount St. Helens remains the most talked-about volcano
hereabouts. There are many beautifully-illustrated talks and
publications on the subject. Dr. M. Lambert, G.S.C., gave one
interesting account, with many excellent photographs culled from
many sources.
